

## **Initiatives under the National TB Elimination Program**

---

As per the initiative taken under the National Strategic Plan (NSP) for Tuberculosis (TB) Elimination five TB patients have been adopted by the faculty of our institute. We have been monitoring their treatment and wellbeing since then in coordination with the KGMC officials. We have extended our full hearted support to the TB patients whether it be moral support or financial support and shared our contact information with them so that they can always contact us in case of any need.
